

TSUH (Speed-head Wellhead)

The TSUH speed head system takes multi-bowl technology one step further than ever before. By landing two strings of pipe in one compact forged housing.

The TSUH system eliminates one complete BOP nipple-down/nipple-up thereby saving significant rig time. The TSUH wellhead improves safety compared to conventional wellheads by reducing the number of potential leak paths

PRODUCT RANGE

- Pressure: 2000psi ~ 20000psi
- Material: AA ~ HH
- Temperature: -75 o F ~ 250 o F
- PSL: PSL 1-4
- PR: PR1, PR2
