

TSSH (Time-Saving Wellhead)

The TSSH Split Speed head offers significant time-saving and safety-enhancing advantages over conventional wellheads and is compatible with today's advanced drilling methods.

The Speed head is a multi-bowl system. Safety is improved and installation time is reduced by running, landing, and sealing the two strings without removing the BOP stack.

PRODUCT RANGE

- Pressure: 2000psi ~ 20000psi
- Material: AA ~ HH
- Temperature: -75o F ~ 250o F
- PSL: PSL 1-4
- PR: PR1, PR2
